Motorsazan company is certified by TUV NORD for conformity with ISO /TS/16949, ISO 9001, ISO18001, ISO 14001 standards

All ratings based on operating under ISO 3046 condition using typical fan sizes and drive ratios. For operation outside of these condition please consult with Motorsazan company. Performance tolerance quoted by Motorsazan is $\pm 5\%$.

Electrical ratings assume a power factor of 0.8 and a generator efficiency of 90%.

Fuel specification: BS2869 Part 2 1998 Class A2 or ASTM D975 D2.

Rating Definitions:

Prime power: Power available at variable load in lieu of main power network. An overload of 10% is permitted for one hour in every twelve hours of operation.

Standby power: Power available at variable load in the event of a main power network failure. No overload is permitted.
